### Attention Creek Cleanup Volunteers:

#### Save the Dates.

GreenTown is participating in a modified National River Cleanup this May. Want to volunteer? Need volunteer hours for school or scouts? Instead of meeting as a large group, this spring Valley Water encourages us to work in small groups on Saturday mornings in May (pick one or do them all!). There will be multiple opportunities to help on weekends in May. Read more about National River Cleanup Day [HERE](#). Reach out to GreenTown member [Donna Staton](#) for details about how to volunteer.

Season Wrap Up 500 Trees

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

The pandemic cut into our tree planting effort, but we still got 44 trees in the ground. These trees went to homes, schools and even one city park. Yes, we planted two Valley Oaks at the popular Shoup Park near downtown Los Altos. The schools included Covington, Springer, Montclair and Pinewood.

There are still a few trees on backorder, so the number will grow. Including the 162 from the first planting season, we are now over 200 and well on our way to 500.

[Sign up on our website](#) to get a reminder in November for the next planting season.

## April Events

### April 17 | Think You Can't Afford An EV? Think Again!

Invariably, affordability is the first question asked by both the casual passerby as well as someone seriously interested in buying an electric car, the implication being how far you can drive on a single battery charge.

All electric cars have what's called an "EPA Range" which, despite its faults, offers a consistent comparison among different cars. Nowadays, cars have EPA Ranges between 100-400 miles; however, range has never been an issue for most electric car drivers, and [click to read](#) the rest of the article.....[Click here to register for and attend the event.](#)
